

ISLAM YASSER

Data Analyst & Business Intelligence

Cairo, Egypt | islamyasser424@gmail.com | linkedin.com/in/islam-yasser-55048b378 | github.com/islamyasser424-design | Portfolio Website

PROFESSIONAL SUMMARY

Detail-oriented and results-driven Data Analyst bringing proven operational discipline in data quality assurance, multimodal annotation auditing, workload assignment, and performance monitoring. Experienced in building decision-grade business intelligence dashboards and automated reporting workflows using Power BI, Tableau, Looker Studio, Advanced DAX, Microsoft Excel (Power Pivot), Google Sheets, Google Apps Script, SQL (including MySQL), and Python. Proven track record of evaluating 99K+ transactions, designing normalized Star Schemas, and identifying operational bottlenecks and financial leakages. Committed to transforming complex operational datasets into actionable insights that optimize processes and support executive decision-making.

TECHNICAL SKILLS & COMPETENCIES

Business Intelligence & Visualization: Power BI, Tableau, Looker Studio, Advanced DAX Measures, Power Query (M Language), Microsoft Excel, Google Sheets, Power Pivot, Relational Modeling (Star Schema), Interactive Dashboards, What-If Scenario Modeling.

Databases & Querying: SQL Queries, MySQL, Relational Database Management, Data Extraction, Table Joins, Fact & Dimension Tables, Data Integrity.

Data Analysis & Manipulation: Data Cleaning, Exploratory Data Analysis (EDA), KPI Development, Metric Tracking, Trend Analysis, Root-Cause Variance Analysis.

Programming, Scripting & Automation: Python, Google Apps Script, Jupyter Notebooks, Data Parsing, Algorithmic Problem Solving, Web Scraping, Automated Data Ingestion.

Quality Assurance & Operations: Data Annotation, Data Quality Assurance (QA/QC), Multimodal Data Auditing, Error Pattern Analysis, SOP Documentation, Workforce Management (WFM), Workload Allocation, SLA Tracking.

Professional Competencies: Cross-Functional Collaboration, Technical Training & Mentorship, Root-Cause Analysis, Process Standardization (SOPs), SLA Management, Capacity Planning, Structured Problem Solving.

PROFESSIONAL EXPERIENCE

- Workforce Management & Workload Assignment

June 2026 – Present

Micro Engineering Egypt (MEEG) — METI Company

Cairo, Egypt

- Orchestrate daily task allocation and workload balancing across multi-disciplinary operational teams to maintain consistent pipeline throughput.
 - Apply data-driven capacity planning models and workforce management principles to forecast resource requirements and prevent operational bottlenecks.
 - Monitor daily productivity metrics, throughput trends, and SLA completion benchmarks to drive optimal team utilization and on-schedule queue clearance.
- Technical Trainer – Data Annotation

September 2025 – May 2026

Micro Engineering Egypt (MEEG) — METI Company

Cairo, Egypt

- Facilitated technical training on data annotation tools, taxonomy guidelines, and multi-tier quality control workflows for onboarding cohorts.
 - Authored operational Standard Operating Procedures (SOPs), grading rubrics, and modular curriculum documentation to standardize labeling execution.
 - Analyzed defect trends across quality audit logs to isolate recurring error patterns, deploying targeted corrective training modules that raised overall labeling precision.
- Quality Control Technician – Data Annotation / Labeling

September 2024 – September 2025

Micro Engineering Egypt (MEEG) — METI Company

Cairo, Egypt

- Audited high-volume multimodal annotation datasets (image, text, and video) against strict ground-truth criteria to validate training data integrity for machine learning models.
 - Developed and maintained error tracking sheets and audit dashboards in Microsoft Excel to categorize defect patterns and monitor individual annotator accuracy.
 - Collaborated with operational leads and project managers to calibrate edge cases, resolve taxonomy ambiguities, and enforce inter-annotator agreement standards.
- FP/QA Labeler – Data Annotation & Quality Assurance

September 2023 – September 2024

Micro Engineering Egypt (MEEG) — METI Company

Cairo, Egypt

- Executed high-volume first-pass labeling and secondary quality verification on complex multimodal artificial intelligence datasets.
 - Maintained consistent daily production throughput while adhering strictly to dataset taxonomy guidelines and quality thresholds.
- Technical Team Support & Customer Operations

May 2022 – September 2023

iSON Xperiences

Cairo, Egypt

- Resolved escalated technical incidents and service inquiries across omnichannel touchpoints (voice, live chat, and email) in a high-volume operations setting.
 - Partnered with cross-functional technical teams to troubleshoot critical account blockers, consistently meeting contractual first-response and SLA resolution targets.

VERIFIED ANALYTICS PROJECTS (8)

Explore Interactive Dashboards Online ↗

AdventureWorks Business Intelligence & Sales Performance Dashboard

GitHub Repo

Tools: Power BI, Star & Snowflake Schemas, Advanced DAX, Power Query (M)

- Architected a multi-page BI model across Star and Snowflake schemas connecting sales facts to customer demographics, regional territories, and products; developed advanced DAX measures analyzing \$24.9M revenue, \$10.5M profit across 25.2K orders and 17K customers, tracking MoM growth and return rates.

Adidas Global Sales & Reseller Performance Dashboard

GitHub Repo

Tools: Power BI, Star Schema Modeling, DAX Measures, Power Query

- Engineered a centralized Star Schema linking central sales with 6 dimensions across products, resellers, and sales territories; audited \$77.55M in total sales and 204K units sold across 701 resellers and 4K orders, benchmarking sales quotas and wholesale margin health.

Logistics Vision — Fleet & Supply Chain Analytics Dashboard

GitHub Repo

Tools: Power BI, Star Schema, Advanced DAX, Power Query (M)

- Structured a normalized Star Schema connecting operational transportation logs to driver behavior, route categories, and vehicles; architected a 9-page interactive dashboard with dynamic What-If DAX parameters to evaluate route margins, driver safety, and fuel operating expenses.

Amazon Supply Chain & Financial Analytics Dashboard

GitHub Repo

Tools: Power BI, Power Query, Multimodal Logistics Benchmarking, Fulfillment KPIs

- Standardized multichannel fulfillment records and mapped multimodal transit modes (Road, Rail, Air, Sea) against supplier lead times in Power Query; analyzed \$577.60K revenue and 46K units sold, evaluating freight spend per unit (\$5.55 avg) to curb high-cost air freight reliance.

Olist E-Commerce Performance & Logistics Dashboard

GitHub Repo

Tools: Microsoft Excel, Power Pivot, Relational Modeling, KPI Dashboards

- Audited 99,441 transactional order records across 3 dedicated analytical views in Excel Power Pivot; uncovered \$1.35M in revenue affected by 7,826 late deliveries (averaging 10 days of delay) and flagged 11,277 underpayment checkout anomalies to prevent financial leakage.

SuperStore Business Intelligence & Profitability Analysis

GitHub Repo

Tools: Microsoft Excel, Power Pivot, Relational Modeling, Dynamic Slicers

- Constructed a relational model in Power Pivot joining 9,994 order transactions with product hierarchies and returns; analyzed \$2.29M in gross sales (12.47% net margin), identifying top regional profit drivers and highlighting loss-making discounts in Furniture categories.

Coffee Sales Analytics & Interactive Performance Dashboard

GitHub Repo

Tools: Microsoft Excel, Power Pivot, Relational Data Modeling, Power Query

- Structured a relational 1-to-many model in Power Pivot with Power Query ETL pipelines; evaluated \$141,713.50 in revenue across 14,928 transactions and 45,240 items sold, identifying fulfillment splits (In-store vs. Takeaway) and top revenue-generating menu combinations.

Uber Smart Mobility & Operational Performance Dashboard

GitHub Repo

Tools: Power BI, DAX Measures, Power Query, Star Schema

- Designed a Star Schema joining ride bookings to vehicle and trip status dimensions, centralizing operational KPIs in a DAX repository; produced a 5-page operational report quantifying lost distance earnings and isolating driver vs. customer drop-offs.

EDUCATION & PROFESSIONAL TRAINING

Helwan University — Faculty of Arts

Class of 2025

Bachelor's Degree

Cairo, Egypt

- Developed critical thinking, research synthesis, structured problem solving, and analytical communication skills that form the foundation of effective data storytelling.

Specialized Data Analysis Training Program

Completed Curriculum

Instant Software Solutions

Practical BI Curriculum

- Comprehensive curriculum covering relational data modeling (Star Schema), exploratory data analysis (EDA), advanced DAX measures, automated Power Query ETL pipelines, and SQL/MySQL database querying.
